

Allergy Rx Plan

Treat Symptoms/ Anchor Therapy

(Short term control)

1. Use Apoquel, your rescue medication at home, in between Cytopoint injections.
2. Cytopoint injection (lasts approximately 30-60 days)
3. Assess response
 - o Good or not good?
 - o If good, how long?
4. Start Apoquel at home as soon as Cytopoint wears off
5. Schedule next Cytopoint
6. Over 70% success with either Cytopoint or Apoquel

Disease Modifying Treatment

(Long term control)

- Allergy Vaccine:
 - o Injectable or oral spray
 - o Can take 6 to 9 months to take effect
 - o Life long
 - o Is not a cure, better control
 - o 60% good control
 - o 20% ok control
 - o 20% failure (but can try another route and may succeed)

Both

1. Purina DRM diet or Hill's D/D
2. Weekly DermAllay shampoo
3. Dermoscent Essential skin care treatment bi-weekly
4. Follow ups every 3-6 months
